PROFESSIONAL SUMMARY

Junior Web Developer is seeking an opportunity to extend my knowledge in web development, web design, and mobile application development solutions to meet business needs. Having a positive outlook and am always willing to learn new traits. I work well both independently and as part of a team.

PERSONAL PROJECTS

React Project - Modern UI/UX Restaurant

- Focused on React functional components and their reusability
- From soft and pleasant animations to complex gradients
- Perfectly placed media queries for satisfactory responsiveness covering almost all devices
- Display: https://huataodong.github.io/Modern_UI_UX_Restaurant/

Java Project - Socket Parse and Transfer Atom XML

- A client/server system that aggregates and distributes ATOM feeds. A client that makes an HTTP GET request to the server and then displays the feed data, stripped of its XML information.
- An aggregation server that responds to requests for feeds and accepts feed updates from clients. The aggregation server will store feed information persistently, only removing it when the content server who provided it is no longer in

Recently working on a Full Stack MERN Social Media App with Auth, Pagination and Comments
